Brocade m6505.

Easy control: A centralized user interface allows you to manage different fabrics with a simple point and click. Rapid resolution: â, diagnostic doors (ports d) allow you to identify and isolate quickly and isolate the problems of Ótica and cable. Simplified and flexible implementation implements the M6505 as a brocade access gateway or as a complete fabric switch. This makes the gateway transparent access to SAN fabric, greatly reducing the management of the network edge. Know the demands of intransigent I / O storage of business class. Imagine this responsive data sheet is included in the page of your WebShop product. Dell Networking Products Dell 8/4 Gbps FC Pass-Pass-Through 8 / 4Gbps Fiber Channel Fiber Pass Mode for M1000E Mine Dell 8 / 4Gbps FC San Simplified Fiber Channel Connectivity for Your Poweredge M1000E e Mine Brocade M6505 Fiber Channel Switch Add 16 GBPS Fiber Channel Connectivity Between Servers, Storage and SAN As needed, without increasing your data center footprint. How to integrate Icecat Live JavaScript. Help ensure activity time with even four chassis switches for complete redundancy. There is no limit for how many groups of trunks can be configured at 384 Gbps wrench bandwidth width, full duplex tissue latency for locally switched doors is 700 ns; The correction of forward errors (FEC) adds 400 ns between e ports (pattern enabled) Class 2 frame maximum size classes, class 3, class f (inter-switch frames) types 12 to 24-door climbing port using ports on Demand (POD) Capabilities Trade Types of Data Tissue Switches Supporting Unicast Media Types requires hot-pluggable brocade, small plugaulable form (SFP +), connector LC; Short wavelength (SWL), length of Long (LWL); Long length extended duration (ELWL); The distance depends on the art fiber cable and door speed. Brocade M5424 FAIL SWITCH INTEGRATION OF INTERGANCE Fiber Channel Technology Using the PowerEdge Á Á Á Á Á "e M1000E, the Brocadeâ M5424 and Dell Á" e "Á" e "Á" e "Á" e. Protect your SAN and server investments with flexible speed options and scalable growth . Supports Optical Transceivers SFP + (8 and 16 Gbps). Buy just what you need now and add more blade off the road. The access gateway mode uses N. PORT alternating patterns ID of virtualization (NPIV) to present physical and virtual servers directly to the San tissue ninflower. Brocade Advanced Performance Monitoring Brocade Tissue Services (including E PORTS, F PORTS and Fabric Mode); Brocade Adaptive Networks (Limitation of the ticket rate, traffic insulation, QoS); bottleneck detection; zoning advanced brocade (standard zoning, door / wwn door, transmission zoning); Dyan fabric provisioning (DFP); Dynamic path selection (DPS); Extended drill fabrics of; Improved BB criterion recovery. Brocade tissue clock, Fdmi, Framework redirection; Trunking based on tables; FSPF; IPOFC; Brocade Isl stroking; Managemnt Server; Npiv; NTP V3; Fencing port, Notification of registered state change (RSCN); Relief Committee Service (RCS); Optimization of the server application (SAO); Simple Name Server Options (SNS) Media Options SFP, ON Demand Doors (12-Port Upgrade) Enterprise Performance Pack; ISL Trunking, Adaptive Network, Advanced Performance Monitoring, Tissue Clock and management of extended tissues HTTP, SNMP V1 / V3 (FE MIB, FC Management MIB), SSH; Audit, syslog; Advanced web tools Brocade, advanced performance monitoring, brocade tissue clock; Network Brocade Advisor San Enterprise or Brocade Network Advisor San Professional / Professional Plus; Command Line Interface (CLI); Compatible with SMI-S; Administrative domains; test for the offline Diagnostics Diagnostics Complement Features, including Loopback Element / Older, Link / Latency / Distemment; Post and online / offline diagnostics incorporated, including environmental monitoring, fcing and patinfo (FC (FC Frame Viewer, Non-Disruptive Rebitization of Daemon, Door Mirroring, Optical Saúde Monitoring, Power Monitoring, Tracking Record and Tracking Restet Chassis (RRD) Chassis 272.75 x 272.75 x 307.24 mm

(10.74 x 10.74 x 12.09 in.) Environmental operation temperature: 0Â°C at 40 Â°C (32 ° to 104Â ° F) Temperature Not Operator: -20 Â°C At 70 ° C (-4Â ° F: 158Â ° F) Operational altitude: until 3,048 m (10,000 feet) Storage altitude: until 10,668 km (35,000 feet (35,000 feet) Relative humidity: 10% to 90% Non- Operator Unoperating Relative Moisture: 5% to 95% CC Power Input: 12V and 3.3V FOM Chassis Power Consumption: 30W A 40W PREPARATIONS NOTES: PREPARE AND AVAILABILITY OF PRODUCTS Subject to change without warning. The M6505 Brocade in access gateway mode can connect servers to Rie b Brocade B Brocade enabled to NPiv, BEY BROCADE M and other san fabrics. Warranty: 3 Years NBD Long Product Name Dell PowerConnect Brocade M6505 Managed Black, Gray: The Short Editorial Description Editorial from Dell PowerConnect Brocade M6505 Managed Black, Gray SWITCH Config Config (FI), 24 Fiber Channel Ports 16Gbps / 4x SFP +, ON Demand Pod Ports, Serial Door (RJ-45), 2.10Kg Brocade M6505 San Mode San 1 / O Product SettingsDerprise 24-Portentry-Level 12 Ports242412 (Update Afo de 12 portas) IncluAdo OpticSight 16 Gbps SFP + quatro 16 Gbps SFP+Two 16 Gbps SFP+ISL TrunkingIncludedOptionalOptionalAdaptive NetworkingIncludedOptionalOptionalAdvanced Performance MonitoringIncludedOptionalFabric WatchIncludedOptionalExtended FabricsIncludedOptionalOptionalBROCADE M6505 FOR M1000e-SERIES BLADE ENCLOSURES SPECIFICATIONSA System ArchitectureFibre Channel portsSwitch mode: 12- and 24- Port Configurations (12-Port Increment Through Ports on Demand [Pod] License); Universal (E, F, M, D) PortsBrocade Access Gateway Standard Door: 16 f ports, 8 n_portsscalability Full architecture with 239 switches maximum maximum maximum Assets; 56 Switches, 19 heels in tissues OSA® Brocade fabric; 31 switches, three wiring in the tissues Brocade M-EOS; Larger certified fabrics such as compulsoryReroperabilityBroocity 3xxx, 4xxx, 5xxx and 6xxx switches; Brocade DCXâ® and Brocade DCX 8510 BackbonesAccess Mode Supports Brocade, McData and Cisco FabricsPertifement - Automatic Sensation of 2, 4, 8 and 16 Gbps Speedsaggregate Bandwidth384 Gbps DuplexFabric latency for doors switched locally is 700 ns; The front error (FEC) adds 400 ns between e_ports (standard enabled) Maxima frame size 2112-byte Class 2 payloadclasses, class 3, class f (inter-switch port frames) D. Dell Networking Products Fiber Channel Blade Switches Brocade M6505 Fiber Channel Channel Call for Precifications! Click here to jump for more precision! Add 16 Gbps fiber channel connectivity between servers, storage and san, as needed, without increasing your data center footprint. Manage the growth of the physical and virtual explosive server with pay-as-you-growing scalability. The Dynamic POD feature assigns port licenses based on your connectivity choices. Fiber Channel Ports Switch Mode: Settings 12 and 24 ports (12 ports increment through demand ports [POD] licenses); Universal (and, f, m, d) Full fabric architecture with 239 maximum maximum certificate certificate 6000 active assets; 56 switches, 19 wiring in fabric fabrics of brocade fabric; 31 Switches, three wiring in Brocade M-EOS M-EOS Larger certified fabrics As required Brocade interoperability 3xxx, 4xxx, 5xxx and 6xxx switches; DCX Brocade and Brocade DCX 8510 Backbones Access Mode Gateway Supports Brocade, McData and Cisco Fabric Performance of 2, 4, 8 and 16 Gbps Doors ISL Velocities Entering to eight ports of 16 Gbps per Trunk of ISL; until 128 Gbps by ISL trunk. Supports SFP + (8 and 16 Gbps) SFP + (8 and 16 Gbps) services: Some tissue services do not apply or are available in BrocadeAccess gateway mode. Advanced monitoring of advanced performance (including the best talkers for e_ports, f_ports and fabric mode); Brocade adaptive networks (Limitation of ticket rate, traffic isolation, QoS); Bottleneck detection; Zoning advanced brocade (pattern zoning, port / wwn door, transmission zoning); Provisioning of dynamic fabric (DFP); Dynamic path selection (DPS); Stretched brocade fabrics; Improved BB criterion recovery; Brocade tissue clock; Fdmi; Framework redirection; Trunking based on tables; FSPF, IPOFC; Brocade Isl stroking; Management Server; Npiv, NTP V3; Fencing port; Notification of registered state change (RSCN); Relief Committee Service (RCS); Optimization of the server application (SAO); Simple Name Server (SNS) Option Media, On Demand Ports (12-Port updation) Enterprise Performance Pack: ISL Trunking, Adaptive Networking, Advanced Performance Monitoring, Tissue Clock and Management Software CLOSSMANAGEMENTS EXTENDED, SNMP V1 / V3 (FE MIB, FC Management MIB), SSH; Audit, syslog; Advanced web tools Brocade, advanced performance monitoring, brocade tissue clock; Brocade Network Advisor San Enterprise or Brocade Network Advisor San Professional / Professional Plus; Command Line Interface (CLI); Compatible with SMI-S; administrative products; Test Licenses for Capability Capability, SSH V2, HTTPS, LDAP, RADIUS, Function-Based Access Control (RBAC), DH-CHAP (Between Switches and Final Devices), Binding door, switching connection, safe, safe RPC, Copy (SCP), Reliable Switch, IPsec, IP FilteringManagement AccessIn-Band Over Fiber Channel; Serial Port (RJ-45) DiagnosticsD port Diagnostics Offline, including Loopback Electric / Older, Link / Latency / Latency / Distemment; Incorporated online / offline diagnostics, including environmental monitoring, fcing and patinf (FC traceroute), framework viewer, non-disruptive rescriptization of daemon, port mirroring, monitoring of ostythical health , Power Monitoring, Tracking Tracking and Bearing Reset Detection (RRD) Any port in the switch can claim a free task of the available POD licenses pool. Dell Networking Products Fiber Channel Blade Switches Brocade M6505 Fiber Channel Channel Call for Precifications! This is a demonstration of a perfect insertion of an Icecat Live product data sheet on your site. Burning fast and scalable Fiber channel connectivity opens the port for blazing-fast of 16 Gbps fiber channel bandwidth range from end to tip on SAN servers, storage and networks with brocade M6505 Fiber Channel Blade brocade. A € Enabling more plans, more fastest and simpler tissues with fewer cables, increasing the consolidation by reducing complexity and network costs. Maximize performance and protect your investments in SAN and Server with 16/8/4 Gbps flexible options and scalable growth. Dining Doors on Demand (POD) provides a flexible mechanism to allocate port licenses you can buy to extend the base functionality of your brocade switches. 1 / O Consolidated: Integrate 1 / O of all blade servers in until eight shared switch ports. Easy Integration and Control Brocade M6505 is ideal for today's space, the remaining data centers requiring greater density and simplified control. These additional doors are activated after Install the appropriate license keys. Zero-footprint design: Brocade M6505 presents a hot plated plaugable wall design that is integrated into the existing chassis without taking on additional space or requiring cooling, power power Cabling requirements of traditional external switches. Switches.
